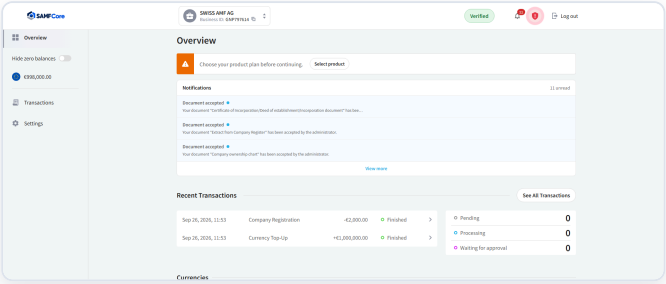
- Crypto & Digital Assets
- Instant Money Transfer
- KYC / KYB
- CRM & Back Office
- Payments
- Cards
- Multi-Currency Exchange
- AML & Compliance
- APIs & Integrations



Real SAMFCore business account overview.

WHY SAMFCORE

Perpetual Licensing

Permanent usage rights within the licensed scope.

Full Source Code Available

Maintain and develop your licensed deployment with your own team or appointed developers.

Customer-Controlled Deployment

Run SAMFCore on infrastructure you control.

Provider-Independent Architecture

Connect banking, payment, card, KYC/KYB, AML, custody and other providers selected for your deployment, subject to technical compatibility and integration scope.

Progressive Cutover Migration

Move from an existing platform in controlled stages — included with Enterprise Global within agreed implementation scope.

Under the perpetual model, SAMFCore does not charge a per-end-customer software licence fee or a transaction-volume software licence fee.

In Operational Use Since 2021

SAMFCore has been deployed in live financial-services environments since 2021.

Customer References

Customer references may be available during advanced due diligence, subject to client approval.

samfcore.com · Swiss AMF AG. "Perpetual" refers to contractual usage rights within the licensed scope; the underlying SAMFCore IP remains with Swiss AMF AG unless expressly agreed otherwise. Full Source Code availability depends on the package; for Enterprise Global it is released once fully paid. Regulated banking, card, custody, KYC/KYB, AML and other provider services are supplied separately by customer-selected third parties. Pricing and terms are subject to agreement.
